Foodfinder III Beta Version: 1.0.1000.19683 Status: Connected

Special functions

Setup/ Look-up

To add new information for use later or to look-up existing information

Add data

Add name of group
Create and link different groups to projects
Add information for individual and link to groups
Enter information on food consumed

Analyse data and generate reports

Analyse food intake data
Analyse recipes
Export all the information to Excel for further use/analysis

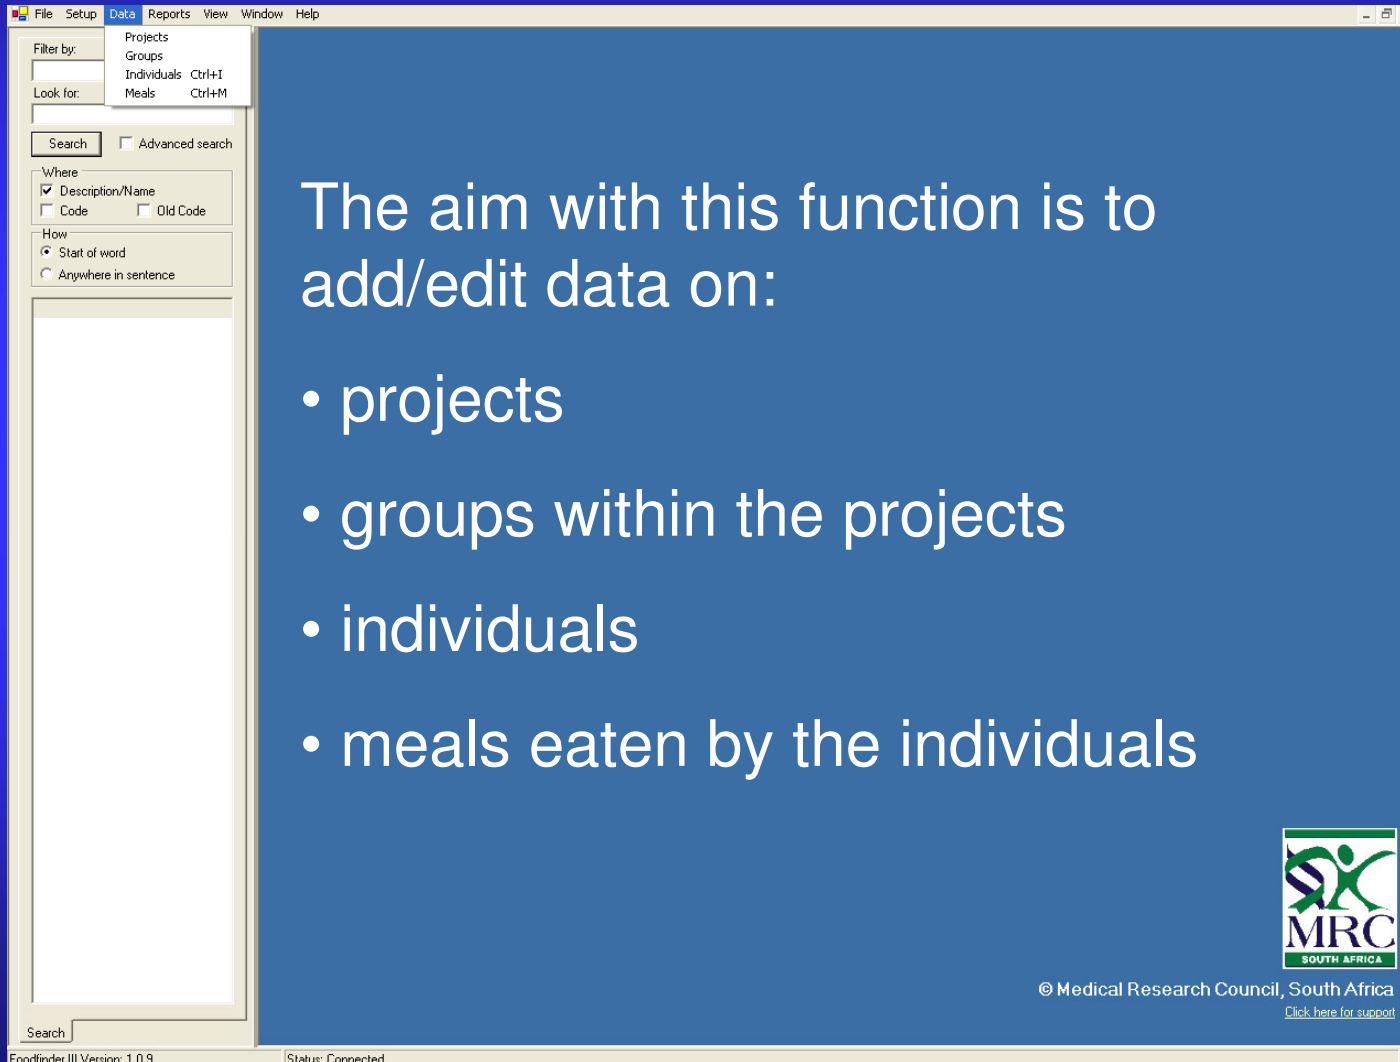

The screenshot displays the Foodfinder III software interface with three overlapping windows. The left window shows the 'Setup' menu with options: Food Items, Recipes, RDA, Units, Servings, Meal Times, Field Workers, Observation Types, and System Users. The middle window shows the 'Data' menu with options: Projects, Groups, Individuals (Ctrl+I), and Meals (Ctrl+M). The right window shows the 'Reports' menu with options: Meal Analysis, Recipe Analysis, Export Analysis, Export Component Types, Export Food Groups, Export Food Items, Export Meal Times, Export Observation Types, Export Observations, and Graphs. Each window also features search filters and options for 'Where' and 'How' to search for data.

Foodfinder III Beta Version: 1.0.1000.19683 Status: Connected

How to add/edit data

The screenshot shows the 'Data' menu of the Foodfinder III software. The menu is open, displaying options: 'Projects', 'Groups', 'Individuals Ctrl+I', and 'Meals Ctrl+M'. Below the menu, there are search filters: 'Filter by:' (with a dropdown menu), 'Look for:' (with a dropdown menu), a 'Search' button, and an 'Advanced search' checkbox. Under 'Where', there are checkboxes for 'Description/Name' (checked), 'Code', and 'Old Code'. Under 'How', there are radio buttons for 'Start of word' (selected) and 'Anywhere in sentence'. A large empty list box is visible below the filters. The status bar at the bottom indicates 'Foodfinder III Version: 1.0.9' and 'Status: Connected'.

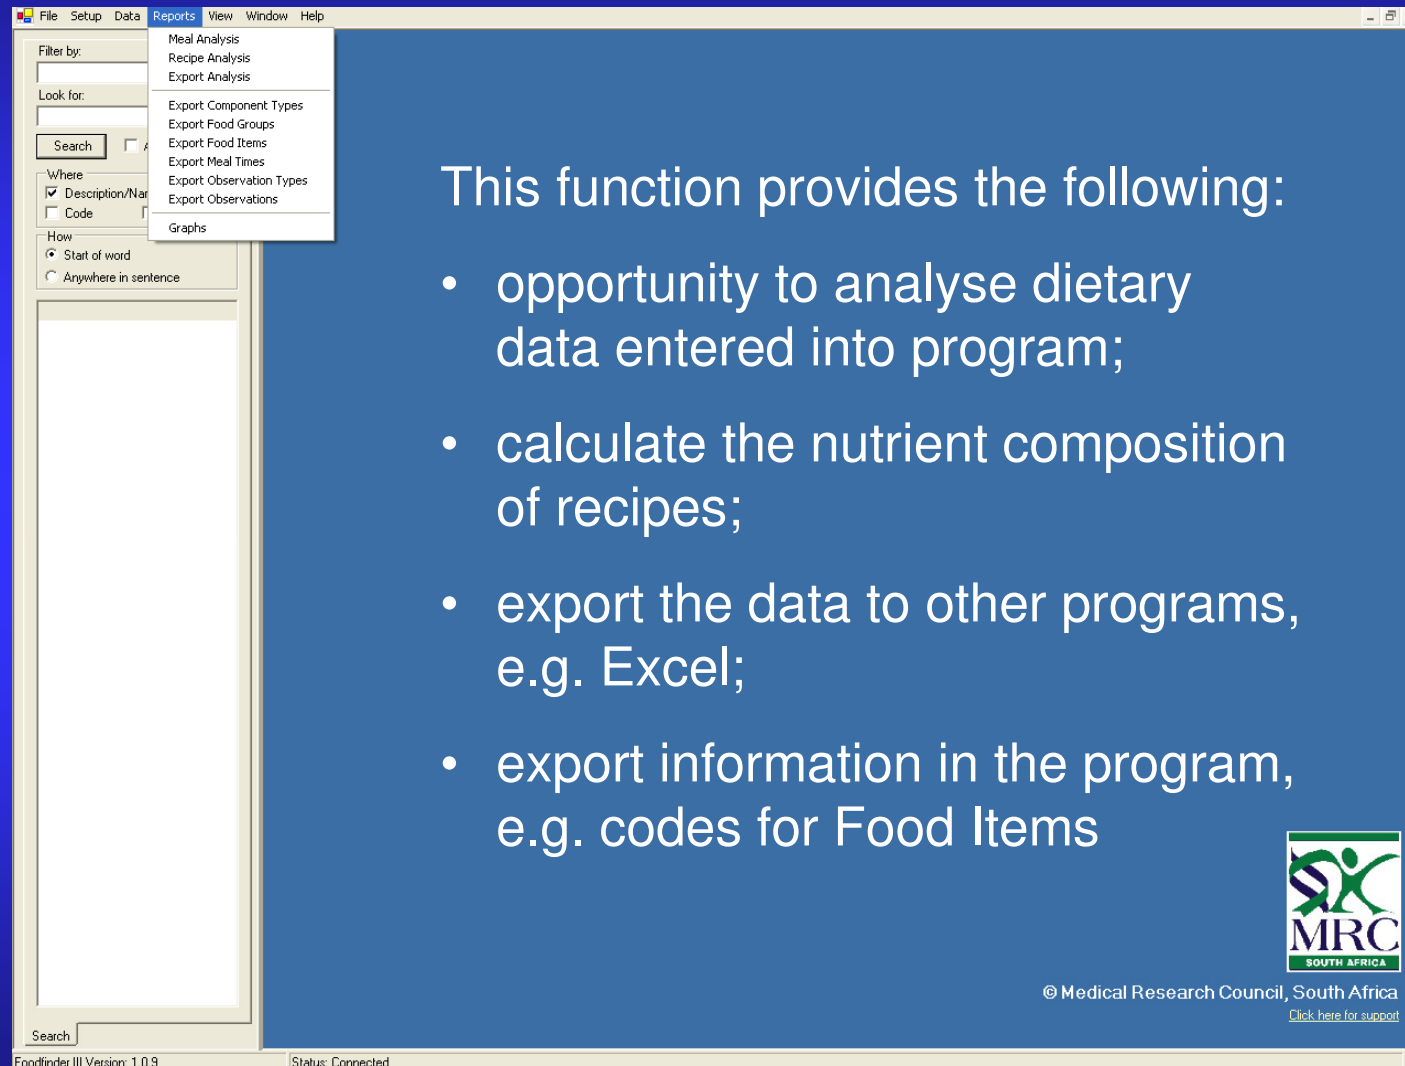

The aim with this function is to add/edit data on:

- projects
- groups within the projects
- individuals
- meals eaten by the individuals

REPORTS

The screenshot shows the 'Reports' menu in the Foodfinder III software. The menu options are: Meal Analysis, Recipe Analysis, Export Analysis, Export Component Types, Export Food Groups, Export Food Items, Export Meal Times, Export Observation Types, Export Observations, and Graphs. The 'Where' section has 'Description/Name' checked and 'Code' unchecked. The 'How' section has 'Start of word' selected and 'Anywhere in sentence' unselected. The status bar at the bottom indicates 'Foodfinder III Version: 1.0.9' and 'Status: Connected'.

This function provides the following:

- opportunity to analyse dietary data entered into program;
- calculate the nutrient composition of recipes;
- export the data to other programs, e.g. Excel;
- export information in the program, e.g. codes for Food Items
